DETAILED ACTION

Election/ Restriction

Claims 1-24 are pending in this application.

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 15-23**, drawn to a system for dissipating heat from a semiconductor device comprising a heat-dissipating package for a semiconductor device including a thermally conductive lid, classified in class 257, subclass 704.
 - II. **Claims 1-14 and 24**, drawn to a method for removing energy from a semiconductor device comprising forming a heat-dissipating package for a semiconductor device including forming a lid, classified in class 438, subclass 125.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of Invention II would not necessarily imply unpatentability of Invention I, since the process of Invention II could be used to make other and materially different product. For example, the process as claimed in Invention II could be used to make a system for dissipating heat from a semiconductor device comprising a heat-dissipating package for a semiconductor device including a conductive layer deposited in at least one cavity, the conducting layer having

a melting point equal to the maximum operating temperature of the semiconductor device, instead of the conducting layer having a melting point greater than the maximum operating temperature of the semiconductor device as claimed in Invention I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu-Tu Ho whose telephone number is (571) 272-1778. The examiner can normally be reached on 6:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DAVID NELMS can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
